

Valvole aseptiche con diaframma

Aseptic valves with diaphragm

B BWP1

BBWP1

STRUTTURA VALVOLA		
Connessioni da DN15 a 100	DIN, SMS, IDF, BS (RJT), Clamp, Flangia	Altre connessioni a richiesta
Materiale a contatto con il prodotto	AISI 316L (1.4404)	Altro materiale a richiesta
Materiale guarnizioni a contatto con il prodotto (omologazione FDA)	EPDM, FKM, HNBR e P.T.F.E.	Altro materiale a richiesta
Materiale diaframma	P.T.F.E. a contatto con il prodotto	
Temperatura massima prodotto (EPDM applicazioni con aria)	150 °C (302 °F)	Per temperature diverse contattare Bardiani Valvole
Temperatura minima prodotto (EPDM applicazioni con aria)	-10 °C (14 °F)	
Pressione massima prodotto	10 bar (145 psi)	
Pressione massima di tenuta	Vedi Tabella	
Finitura superficiale materiale a contatto con il prodotto	Ra0.8µm (altri tipi di finitura a richiesta)	
STRUTTURA ATTUATORE PNEUMATICO		
Attacchi aria	1/8" (BSP) per tubo 6x4mm	
Pressione	Da 6bar (87psi) a 8bar (116psi)	
Materiale cilindro	AISI 304 (1.4301)	
Materiale guarnizioni	NBR

Deviatrice / Divert

TECHNICAL DETAILS

VALVE STRUCTURE		
Connections from DN15 to DN100	DIN, SMS, IDF, BS (RJT), Clamp, Flange	Other connections on request
Material in contact with the product	AISI 316L (1.4404)	Other material on request
Material gaskets in contact with the product (FDA homologation)	EPDM, FKM, HNBR and PTFE	Other material on request
Material diaphragm	P.T.F.E. in contact with product	
Max product temperature (EPDM applications with air)	150 °C (302 °F)	For other temperature, please ask Bardiani Valvole
Min product temperature (EPDM applications with air)	-10 °C (14 °F)	
Max product pressure	10 bar (145 psi)	
Max working pressure	See table	
Finish on surfaces in contact with the product	Ra 0.8 µm (other types of surface finish on request).	
PNEUMATIC ACTUATOR STRUCTURE		
Air connectors	1/8" (BSP) for pipe 6 x 4 mm	
Air pressure	From 6 bar (87 psi) to 8 bar (116 psi)	
Cylinder material	AISI 304 (1.4301)	
Gasket material	NBR	

BBWM1

**VALVOLA AD AZIONAMENTO
MANUALE CON/SENZA LEVA**

BBWM1

**MANUAL OPERATED VALVE
WITH/WITHOUT HANDLE**

OTTURATORE IN PEEK

- Nessun elastomero nell'otturatore
- Facilità di manutenzione

SHUTTER IN PEEK

- No elastomers on the shutter
- Easier maintenance

DIAFRAMMA

L'utilizzo di un diaframma all'interno del corpo valvola consente di ottenere una sicura separazione fra prodotto all'interno della valvola e ambiente esterno, abbinando alla asetticità le caratteristiche di regolazione delle valvole modulanti. In caso di rottura del diaframma il prodotto esce dal raccordo posizionato nel portatenuta.

DIAPHRAGM

The use of a diaphragm inside the valve body allows to obtain a safe separation between the product inside the valve and the external environment, combining asepticity with the characteristics of regulation of the modulating valves. In case of diaphragm rupture, the product would come out of the fitting positioned in the cap.

ESECUZIONI SPECIALI SU RICHIESTA

Ogni accessorio è disponibile su richiesta del cliente per tutti i diametri e tutte le configurazioni corpi valvola. È inoltre possibile la personalizzazione di attacchi, diametri oppure soluzioni non presenti a catalogo. Bardiani Valvole consiglia di consultare sempre l'ufficio tecnico in fase d'ordine per ulteriori informazioni e studi di fattibilità.

SPECIAL OPTIONS AND VARIA- TION ON REQUEST

On request all accessories are available for all sizes of valve and body configurations. Additionally special ports, diameters and other tailor-made solutions are available. Bardiani Valvole can also provide technical support, advice and feasibility analysis for other requests.
